

## Green Building

Tuscan StoneWorx is committed to supplying quality products and services to our customers while recognizing the importance of operating our business in an environmentally responsible manner. Our commitment to environmental stewardship and safety for employees and customers is demonstrated by efforts to minimize the impacts of our operations on the environment. From ongoing research and development focused on sustainable products, to recycling our plants waste water, Tuscan StoneWorx is focused on the conservation of natural resources and reduction of our carbon footprint.

### Products

Tuscan StoneWorx products are composed from natural minerals and water based; they contain no heavy metals, formaldehyde or ammonia. They are low VOC, non-combustible, and resistant to mold, mildew and insects. Our Envision Concrete Countertops are an eco-conscious option to petroleum based synthetic products. Our hand applied limestone coatings are durable and impact resistant and can withstand weather and physical abuse, leaving them looking great for decades with little maintenance. Tuscan Stone, Tuscan Plaster, and Tuscan Cast Stone do not significantly contribute to land fill volume, as they produce very little waste on the job, come in biodegradable bags, and when ready to change color or finish do not require removal; instead they're simply re-coated, becoming part of the substrate. If they were to be removed, instead of going to a landfill they can be recycled into new aggregate.

### LEED

As a member of the USGBC and a proponent of LEED, Tuscan StoneWorx products can contribute to your project earning LEED points. Our Cold Stone Mix can be cast or hand applied and contains post industrial waste as well as post consumer recycled content that can contribute to LEED's Material and Resources Credit 4 'recycled content'. Tuscan Stone and Tuscan Plaster's low VOC may contribute to LEED's Indoor Air Quality Credit 4 'low emitting material – paints and coatings' and depending on the jobs location LEED's Materials and Resources Credit 5 'regional materials' could be applicable. Please contact Tuscan Stoneworx for more information on how its' materials can help your project qualify for LEED points.
